DEPT. OF TRANSPORTATION

COMMENTS

2005 NOV 22 A 11: 38

I urge you to reduce oil consumption by increasing gas mileage standards for cars and light trucks to 40 miles per gallon, which would reduce oil consumption, save billions at the pump, and reduce global warming.

The most important action we can take to protect our environment and defend ourselves from future prices spikes is to use less gasoline in our cars and trucks. The current light truck proposal only harms consumers and the environment because it is such a paltry increase to miles per gallon standards, it allows for new loopholes so that manufactures can sidestep overall increases, and it counteracts state initiatives to clean up cars.

I also urge you to preserve states' rights to regulate vehicle emissions by removing language from your proposal that says federal law preempts states from doing more to increase gas mileage.

I understand my comments will be posted on a public website.

Sincerely,

Mary Bandura  
481 Neck Rd  
Tiverton, RI 028784011
